**GUIDELINES ON COMMON AND SIMPLIFIED NORMS FOR PROCESSING INVESTOR'S SERVICE REQUESTS BY REGISTRARS AND TRANSFER AGENTS (RTAS)**

Dear Members,

The Securities and Exchange Board of India, vide its latest Master Circular No. SEBI/HO/MIRSD/POD-1/P/ CIR/2024/37 dated May 7 2024, has issued guidelines on common and simplified norms for processing investor's service requests by RTAs, has notified common and simplified norms for processing investor's service request by the Registrars and Transfer Agents (RTAs) and norms for furnishing Permanent Account Number ("PAN"), Know Your Client ("KYC") details and Nomination.

In terms of the aforesaid circular, all holders of physical securities of the Company are mandatorily required to furnish the following documents / details to the Company's RTA i.e. - MUFG Intime India Private Limited (Formerly known as Link Intime India Private Limited) along with Form ISR-1 for updating their KYC detail:

- a. PAN
- b. Nomination
- c. Contact Details
- d. Bank Account details
- e. Specimen Signature

In case of mismatch in the signature of the holder in the records of Link Intime, the investor shall furnish original cancelled cheque and banker's attestation of the signature as per Form ISR-2.

Investors shall continue to use form SH-13 and SH-14 for declaration of nomination and change in nomination respectively. However, in case investor wants to opt-out of nomination, Form ISR-3 shall be filed.

The security holder(s) whose folio(s) do not have PAN, Choice of Nomination, Contact Details, Bank Account Details and Specimen Signature updated, shall be eligible:

- to lodge grievance or avail any service request from the RTA only after furnishing PAN, KYC details and Nomination.
- for any payment including dividend, interest or redemption payment in respect of such folios, only through electronic mode with effect from April 01, 2024. An intimation shall be sent by the Listed Company/ Entity to the security holder that such payment is due and shall be made electronically only upon complying with the requirements stated in Para 19.1 of the Master Circular.

In this regard kindly take note of the below:

1. In case of non-updation of (a) PAN or (b) Choice of Nomination or (c) Contact Details or (d) Mobile Number or (e) Bank Account Details or (f) Specimen Signature in respect of physical folios, dividend/ interest/redemption payment etc. shall be paid only through electronic mode with effect from April 01, 2024 upon furnishing all the aforesaid details in entirety.
2. If a security holder updates the (a) PAN or (b) Choice of Nomination or (c) Contact Details or (d) Mobile Number or (e) Bank Account Details or (f) Specimen Signature after April 01, 2024, then the security holder would receive all the dividends/interest/redemption payment etc. declared during that period (from April 01, 2024 till date of updation) pertaining to the securities held after the said updation automatically.

In this connection you are required to update your folio either with (a) PAN or (b) Choice of Nomination or (c) Contact Details or (d) Mobile Number or (e) Bank Account Details or (f) Specimen Signature or all of the above in entirety and furnish the details/documents (Form No. ISR-1, ISR-2, ISR-3 & Form No. SH13 / 14) as applicable.

Investors are requested to ensure the above details are updated with Link Intime at the earliest. Please note that above mentioned forms are available on the website of the Company at the below mentioned web address [www.rtextports.com](http://www.rtextports.com).

Or:

From RTA Website i.e. <https://in.mpms.mufg.com/> → Resources → Downloads → KYC → Formats for KYC.

**SEBI'S CIRCULAR ON EASE OF DOING INVESTMENT – “SPECIAL WINDOW FOR RE-LODGE-MENT OF TRANSFER REQUESTS OF PHYSICAL SHARES”**

As an effort to support investors and facilitate ease of investment, the Securities and Exchange Board of India (SEBI) has opened a special window for a period of 6 (six) months, from July 07, 2025, to January 06, 2026, to allow re-lodgement of physical share transfer request(s) that were originally lodged prior to April 01, 2019, but were rejected, returned, or not processed due to documentation deficiencies or other reasons.

This move is aimed at enhancing investor convenience and safeguarding their rights in securities that were purchased but not transferred due to documentation issues.

Key points to be noted by the Investors:

- This window applies only to transfer deeds lodged before April 01, 2019.
- Such shares will be transferred only in dematerialized (demat) form.

Concerned investors are requested to re-lodge the transfer request along with necessary documents to the Company or our Registrar and Share Transfer Agent (RTA) within the above-mentioned period as per below-mentioned details:

## ANNEXURE III MANAGEMENT DISCUSSION AND ANALYSIS

Your directors are pleased to present the Management Discussion and Analysis for the financial year ended March 31, 2025.

### A. INDUSTRY STRUCTURE AND DEVELOPMENTS:

#### BUSINESS OVERVIEW

In the agricultural year 2024–25, record production has been achieved in key crops including rice, wheat, maize, groundnut, and soybean. This record production is largely due to a favourable monsoon and ideal weather conditions. Timely and well-distributed rainfall across major crop growing states significantly improved soil moisture, promoting healthy crop development and creating optimal conditions for cultivation.

Total Rice production is estimated at 1490.74 LMT as compared to 1378.25 LMT in 2023-24, showing an increase of 112.49 LMT. Production of Wheat is estimated at 1175.07 LMT which is higher by 42.15 LMT from the previous year's wheat production.

According to the United States Department of Agriculture (USDA), India's rice production in the coming 2025-26 crop marketing season is estimated to touch all time of 151 million tonnes.

Agriculture plays a vital role in India's economy. 54.60% of the total workforce is engaged in agriculture and allied sector activities. Given the importance of the agriculture sector, Government of India has taken several steps for its development in a sustainable manner.

The **Union Budget 2025-26** has emphasized **agriculture** as the **foremost engine** of India's development, focusing on improving productivity, farmer incomes, rural infrastructure, and self-sufficiency in key commodities. The provisions also extend to animal husbandry, dairying, and fisheries, ensuring holistic growth in the primary sector. Rice, being the staple food for more than half of India's population, holds a significant place in the country's agrarian economy. India is one of the largest producers and exporters of rice globally and its agricultural landscape is dominated by states that contribute substantially to this essential grain.

Your Company is into trading of Agri products, mainly rice. Further, your Company also does trading locally. In developing economies, the growth is powered by increasing young population, growing disposable income, life-style changes etc. In developed economies where penetration and usage are already high, new products addressing needs are emerging to expand and/or change the face of the market.

As per the Ministry of Agriculture and Farmers' Welfare's Second Advance Estimates for 2024–25, India has achieved record production levels across multiple key crops. Total foodgrain output is projected at 3,309.18 LMT, comprising 1,663.91 LMT from Kharif and 1,645.27 LMT from Rabi seasons.

#### GLOBAL SCENARIO

Geopolitical tensions remain a major risk, significantly impacting global markets and business confidence. Ongoing conflicts in key regions have disrupted trade routes, exacerbated energy and commodity price volatility, and heightened the risk of economic fragmentation.

Global grain production for the 2025-26 marketing year is expected to reach a record high, despite a slight downward revision from the previous month, the International Grains Council (IGC) has reported.

India has lifted its ban on non-basmati white rice exports. This move comes as the nation, the world's largest rice exporter, sees an increase in rice inventories and prepares for the upcoming harvest season.

Total production of rice during 2023-24 is estimated at record 1378.25 lakh tonnes. It is higher by 20.70 lakh tonnes than previous year's rice production of 1357.55.

Global rice consumption has surpassed global rice production in recent years, leading to a depletion in rice stocks and an increase in the price of rice globally.

Agriculture remains the backbone of global food security and economic stability, playing a critical role in sustaining the

world's growing population. With the global population expected to reach 9.7 billion by 2050 (United Nations), food production must increase by nearly 70% to meet future demand. The sector also contributes significantly to employment, with over 27% of the global workforce engaged in agricultural activities (World Bank)

Approximately 85% of world basmati exports are from India and therefore, countries looking to purchase basmati rice have limited alternatives

Despite global uncertainty and headwinds, the economy performed well. India remains a relatively bright spot in the global economy, as per the International Monetary Fund (IMF). It is expected to remain the fastest-growing Asian economy and one of the fastest-growing in the world. A conducive domestic policy environment, along with the government's focus on structural reforms, kept domestic economic activity in India robust

The global rice trade landscape witnessed remarkable activity, with several countries emerging as significant contributors to rice exports in 2025. Among the top 10 rice exporting countries are Vietnam, Thailand, and India, leading the pack with substantial export volumes. Each country brings its unique qualities to the table, shaping the landscape of rice production and trade globally.

The agriculture sector in India contributes around 15% to GDP while supporting nearly 42% of the population, playing a crucial role in the country's economy.

## B. OPPORTUNITIES AND THREATS

### i. OUR STRENGTHS

With the consumption of rice going up year after year the use of the commodity will rise further as it becomes staple diet of more and more people all across the world.

Experienced Management: One of the key strengths is highly experienced management and management team helping the Company to source the agricultural produce at right time at competitive prices, quality and quantum. Mutually beneficial relations with contact farmers ensure consistent quality and reliable supply of paddy.

Over the years, we developed unique strengths and capabilities, such as adopted the latest technologies, efficient packaging capabilities and expertise in our supply chain that allowed us to increase our competitiveness.

### ii. HUMAN CAPITAL

The Human Resources (HR) function of an organization is vital to the creation and development of good quality and dedicated human capital, essential to the Company's business and operations. The Company has Human Relations policies in place, which are reviewed and updated regularly in line with the Company's strategic plans. The Company's total employee strength as on 31st March, 2025 stood at 2. Employees are encouraged and motivated to grow across the organisation, while personal and professional growth is ensured through regular interventions. The Company maintains harmonious and friendly relations with its employees. The Company aims to develop the potential of every individual associated with it as a part of its business goal.

### iii. OUR STRATEGY

With the objective to sustain growth, your Company is pursuing several strategic initiatives in all key areas of business

We seek to further strengthen our march towards a leading global Agri product trading and export house by:

- Strengthening our strategic partnership with our clients
- Increasing our relevance to clients by being able to work in the entire spectrum of their business
- Delivering higher business value to clients through the alignment of our structure and offerings to their business objectives.
- To achieve these goals, we seek to increase business from existing and new clients, continue to enhance our engagement models and offerings, expand geographically, continue to develop deep industry knowledge, pursue alliances and strategic acquisitions, enhance brand visibility and continue to invest in infrastructure and employees.

**iv. OPPORTUNITIES**

Rice, a staple for many Indian households, is also a cornerstone for the country's economy. With diverse range of products in their export portfolio, including Basmati, Sona Masori and Brown rice to name a few, Indian rice exporters play critical role in feeding millions around the world.

India is poised to become the world's largest rice producer, overtaking China for the first time in modern history. This milestone comes on the back of a record-breaking food grain output of 353.2 million tonnes (MT) in the 2024-25 crop year (July-June).

By 2050, the world's population is projected to reach 9.8 billion, with India accounting for 1.7 billion (Source: United Nations). To meet the growing food demands of India's population, there is a pressing need to significantly increase the yield per hectare, especially considering the diminishing arable land in the country.

The USDA forecasts India's rice production in 2025 to reach a record high for the tenth consecutive year, despite a slight decline in harvested area.

India is likely to export around 24 million tonnes of rice in the 2025-2026 marketing year, thus coming around 40 per cent of the market share, according to the United State Department of Agriculture (USDA)

The Indian economy has displayed remarkable resilience and sustained growth momentum, supported by structural reforms, a strong consumption base, and increased public and private investment

**v. THREATS**

As an agri-based Company, the businesses are sensitive to weather conditions, including extremes such as drought and natural disasters. The availability of raw materials required for operations and the demand for products may be adversely affected by longer than usual periods of heavy rainfall in certain regions or a drought in India.

Each of the businesses depends on the availability of reasonably priced, high-quality raw materials in the quantities required by operations. Increasing private players and competition from unorganised sector pose a threat to organised rice companies

We operate in a dynamic and highly regulated environment shaped by agro-climatic trends, macroeconomic conditions, evolving global trade policies, and technological shifts.

Declining economies of major importing countries and currency fluctuations adversely impacts international/ export business.

**C. SEGMENT-WISE OR PRODUCT-WISE PERFORMANCE****COMPANY AND PERFORMANCE OVERVIEW**

During the financial year 2024-25, your Company's revenue was Rs. 494.08 lakh whereas revenue figures for the previous year were Rs.571.85 Lakh.

Your Company follows strong customer engagement leading new business from existing and new customers. We have intensified new customer development and is hopeful to see the demand pick up as the macro- economic conditions see a turnaround helped by Government initiatives.

#### D. OUTLOOK

Indian Basmati Rice industry has already an established presence across different international markets thanks to its superior taste and distinctive flavour.

Backbone of the Indian economy, the Indian agriculture industry is the livelihood of over 50% of the nation's population. Indian agriculture, which has done remarkably well in the past few years in terms of output growth, is set to scale up on the back of rising external demand and the sector's wider participation in the global economy.

With the climate change, continuous rising demand by consumers and the food security, rice industry is facing the challenge of producing rice without compromising on efficiency, equitability, environmentally friendly, and more resilience to climate change. It has become imperative to produce rice at lesser land, with lesser water. India is also facing lack of adequate agriculture infrastructure such as technologically advanced equipment, transportation network, and effective public private partnership. India has emerged as the world's fourth-largest economy, with per capita income doubling since 2014, a testament to its sustained economic progress. Despite global headwinds, the way forward remains optimistic, due to enhanced domestic and foreign investments, robust manufacturing growth and improvement in trade and financial services.

#### E. RISKS AND CONCERNS

The Board of Directors and the Audit Committee of the Board review the business risks to which your Company is exposed and the mitigation plans. The senior management team led by the Director and CFO is entrusted to manager risks proactively with appropriate mitigation measures and implementation thereof.

##### KEY RISKS TO WHICH YOUR COMPANY IS EXPOSED INCLUDE

Lack of infrastructure in rural areas including poor means of transport, limited storage facilities, and limited access to credit acts as a key inhibitor for farmers to store and transport their produce to different markets. Indian agriculture is dominated by small and marginal farmers with limited access to resources making it difficult to compete and scale up their production. Rising stiff competition from other Indian companies operating in similar field is likely to pose threat in the short run. Agriculture being vulnerable to climate change like erratic weather patterns, droughts, floods etc., affects the production of crops and increases customer prices

With the Indian weather conditions prone to vagaries, this proves to be an inherent weakness in the Company's business structure. Plant diseases that can result in harvest and yield failures also pose a problem.

Non-timely availability of raw materials may impact the production and which in turn may have an impact on the sales and profitability of the Company.

While the positive outlook for global trade and rising integration in the global supply chain supports net external demand, headwinds from geopolitical tensions such as supply chain disruptions and higher logistics costs, volatility in international financial markets and geo-economic fragmentation pose downside risks.

##### a. Monsoon

Agriculture being vulnerable to climate change like erratic weather patterns, droughts, floods etc., affects the production of crops and increases customer prices.

Agriculture in India is largely dependent on the monsoon. As a result, production of food-grains fluctuates year after year. A year of abundant output is often followed by a year of acute shortage in key crops. Agriculture continues to be dependent on the vagaries of temperature and rainfall. Not only is quantity of rain important, but timing is even more critical.

#### **b. Irrigation**

Although India is the second largest irrigated country of the world after China, only one-third of the cropped area is under irrigation. Irrigation is the most important agricultural input in a tropical monsoon country like India where rainfall can be uncertain.

#### **c. Raw Material Risk**

Quality rice production necessitates smooth supply of premium paddy as the key raw material and any price or production fluctuations of this commodity can hit profitability and adversely impact the Company's business.

Strong farmer relations, built over years through a well-established contact farming system, insulates the Company from this risk.

### **F. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY**

Internal Control Systems are the foundation for ensuring achievement of organisations objectives of operational efficiencies, reliable financial reporting and compliance with laws, regulations & policies.

The Company has in place adequate and appropriate systems of internal controls commensurate with its size and the nature of its operations and these have broadly withstood the test of time. The systems have been designed to provide reasonable assurance with regard to recording and providing reliable financial and operational information complying with applicable statutes, safeguarding assets from unauthorized use, executing transactions with proper authorizations and ensuring compliance of corporate policies.

Internal audit findings, along with recommendations for improvement, are regularly presented to the Audit Committee of the Board.

The Audit Committee, the Statutory Auditor and the top management are regularly apprised of the internal audit findings and regular updates, if any, provided at the Audit committee meetings of the Action taken on the internal audit reports. The Audit Committee of the Board consisting of non- Executive independent Directors reviews the quarterly, half yearly and the annual financial statements of your Company.

#### **Market Trends, Drivers, and Challenges**

The future looks bright for India. Demand will be supported by an expected improvement in household consumption, while prospects for fixed investment remain bright owing to an upturn in the private capex cycle, improved business sentiments, healthy balance sheets of banks and corporates, and the government's continued thrust on capital expenditure.

India's rice production is set to experience steady growth in the coming years.

Market expansion is further aided by the adoption of Basmati rice in the food and beverage sector to prepare biryani, desserts and pilaf, to name a few. There is a surplus of demand for Basmati rice in various regions across the globe, especially in the Middle East, giving the market's positive outlook.

Consumers are planning to focus even more on a healthy diet and to shift their spend to more sustainable products.

#### **ECONOMIC ENVIRONMENT:**

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. Overall, despite multiple global headwinds during the year including economic and geopolitical uncertainties, India's economy grew driven by strong domestic macroeconomic fundamentals and private consumption. This was especially reflected in sectors such as agriculture, mining, manufacturing, electricity and constructure. This was further supported by high gross tax collections

**INDIAN AGRICULTURE AND ALLIED INDUSTRIES**

Policy initiatives such as the Pradhan Mantri Kisan Maandhan Yojana (PM-KMY), Pradhan Mantri Kisan Samman Nidhi (PMKISAN), and Pradhan Mantri Fasal Bima Yojana (PMFBY) have been instrumental in offering financial and income assistance to farmers, increasing their resilience to weather shocks. Agricultural development stands as a pivotal instrument in eradicating extreme poverty, fostering inclusive prosperity, and addressing the nutritional needs of an estimated ten billion people by 2050. New-age technology, enhanced farming practices and government support, further propels market growth.

Despite performing well, the Indian agricultural sector still faces challenges, such as the adverse effects of climate change, fragmented landholdings, suboptimal farm mechanisation, low productivity, disguised unemployment and rising input costs. India's economy is projected to maintain its strong growth trajectory in 2025-26, with GDP expected to expand by 6.5%, reinforcing its position as one of the fastest-growing major economies.

**INDEPENDENT AUDITOR'S REPORT****To the Members of Neelkanth Limited (formerly known as R T Exports Limited)****Report on the Audit of the Financial Statements****Opinion**

We have audited the accompanying financial statements of Neelkanth Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2025, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended and notes to the financial statements, including a summary of material accounting policies and other explanatory information (hereinafter referred to as "financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, its profit including other comprehensive income, the statement of changes in equity and its cash flows for the year ended on that date.

**Basis for Opinion**

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

**Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined that there are no key audit matters to communicate in our report.

**Other Information**

The Company's Board of Directors is responsible for the other information. The other information comprises the management discussion & analysis and director's report included in the annual report but does not include the financial statements and our auditor's report thereon. The above information is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the above other information, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

**Responsibilities of Management and Those Charged with Governance for the Financial Statements**

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting

principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

### **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order.

## ANNEXURE “B” TO THE INDEPENDENT AUDITOR’S REPORT

(Referred to in paragraph 2(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date to the members of Neelkanth Limited on the financial statements for the year ended March 31, 2025)

### **Report on the Internal Financial Controls with reference to financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)**

We have audited the internal financial controls with reference to financial statements of Neelkanth Limited (“the Company”) as of March 31, 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

#### **Management’s Responsibility for Internal Financial Controls**

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over financial reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

#### **Auditors’ Responsibility**

Our responsibility is to express an opinion on the Company’s internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls with reference to financial statements.

#### **Meaning of Internal Financial Controls with reference to financial statement**

A Company’s internal financial control with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

#### **Inherent Limitations of Internal Financial Controls with reference to financial statements**

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Opinion**

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2025 based on the internal control with reference to financial statements criteria over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by ICAI.

The Registered office of the company is situated at 508, Dalamal House, Jamnalal Bajaj Road, Nariman Point, Mumbai – 400021. The name of the Company has been changed from "R T Exports Limited" to "Neelkanth Limited" with effect from 18<sup>th</sup> August, 2023.

Company is engaged in the business of Trading of Agri product, mainly Rice.

The financial statements for the year ended 31<sup>st</sup> March, 2025 were approved and adopted by board of directors in their meeting held on 26<sup>th</sup> May 2025.

**Note 2 – BASIS OF PREPARATION:**

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) and the relevant provisions of the Companies Act, 2013 ("the Act").

The Company prepared its financial statements in accordance with the Indian Accounting Standards (Ind AS) as notified under the section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 (Indian GAAP).

The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities, which are measured at fair value/ amortised cost.

The financial statements are presented in Indian Rupees, which is the company's functional and presentation currency.

**Note 3 – MATERIAL ACCOUNTING POLICIES:****3.1 Property, Plant and Equipment:**

Property, plant and equipment are carried at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes purchase price, borrowing cost and any cost directly attributable to bringing the assets to its working condition for its intended use.

Depreciation on the property, plant and equipment is provided using Straight Line method over the useful life of assets as specified in schedule II to the Companies Act 2013. Depreciation on Property, plant and equipment which are added disposed off during the year, is provided on pro-rata basis with reference to the date of addition/deletion. Freehold land is not depreciated.

The assets residual values, useful lives and method of depreciation are reviewed at each financial year end and are adjusted prospectively, if appropriate. Property, plant and equipment are eliminated from financial statement, either on disposal or when retired from active use. Profits/ Losses arising in the case of retirement/ disposal of Property, plant and equipment are recognised in the statement of profit and loss in the year of occurrence.

**3.2 Inventories**

Inventories are valued at the lower of cost and net realizable value. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. The cost of inventories comprises of cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their respective present location and condition. Cost is computed on the weighted average basis.

**3.3 Cash and cash equivalents:**

Cash and cash equivalents in the balance sheet comprise cash at banks, cash on hand and short term deposit with an original maturity of three month or less, which are subject to an insignificant risk of changes in values.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the company's Cash management.

### 3.4 Financial Instruments- Initial recognition, subsequent measurement & impairment:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### Financial assets - Initial recognition and measurement:

All financial assets are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Financial assets are classified, at initial recognition, as financial assets measured at fair value or as financial assets measured at amortised cost.

#### Financial assets - Subsequent measurement:

For the purpose of subsequent measurement, financial assets are classified in two broad categories:-

- a) Financial assets at fair value
- b) Financial assets at amortised cost

Where assets are measured at fair value, gains and losses are either recognised entirely in the statement of profit and loss (i.e. fair value through profit or loss), or recognised in other comprehensive income (i.e. fair value through other comprehensive income)

A financial asset that meets the following two conditions is measured at **amortised cost** (net of any write down for impairment) unless the asset is designated at fair value through profit or loss under the fair value option.

- a) **Business model test:** The objective of the Company's business model is to hold the financial asset to collect the contractual cash flow.
- b) **Cash flow characteristics test:** The contractual terms of the financial asset give rise on specified dates to cash flow that are solely payments of principal and interest on the principal amount outstanding.

A financial asset that meets the following two conditions is measured at **fair value through other comprehensive income** unless the asset is designated at fair value through profit or loss under the fair value option.

- a) **Business model test:** The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flow and selling financial assets.
- b) **Cash flow characteristics test:** The contractual terms of the financial asset give rise on specified dates to cash flow that are solely payments of principal and interest on the principal amount outstanding.

All other financial asset is measured at fair value through profit or loss.

#### Financial assets - Derecognition

A financial assets (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's statement of financial position) when:

- a) The rights to receive cash flows from the asset have expired, or
- b) The Company has transferred its rights to receive cash flow from the asset.

#### Financial liabilities - Initial recognition and measurement:

The financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction cost.

**Financial liabilities – Subsequent measurement:**

Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts are approximate at their fair value due to the short maturity of these instruments.

**Financial Liabilities – Derecognition:**

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another, from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amount is recognised in the statement of profit and loss.

**3.5 Impairment of assets**

An asset is considered as impaired when at the date of Balance Sheet, there are indications of impairment and the carrying amount of the asset, or where applicable, the cash generating unit to which the asset belongs, exceeds its recoverable amount (i.e. the higher of the net asset selling price and value in use). The carrying amount is reduced to the recoverable amount and the reduction is recognized as an impairment loss in the statement of profit and loss. The impairment loss recognized in the prior accounting period is reversed if there has been a change in the estimate of recoverable amount. Post impairment, depreciation is provided on the revised carrying value of the impaired asset over its remaining useful life.

**3.6 Provisions, Contingent Liabilities, Contingent Assets and Commitments:**

Provisions are recognised when the company has a present obligation (Legal or constructive) as a result of past event. It is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using equivalent period government securities interest rate. Unwinding of the discount is recognised in the statement of profit and loss as a finance cost. Provisions are reviewed at each balance sheet date and are adjusted to reflect the current best estimate.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made. Information on contingent liability is disclosed in the notes to the financial statements. Contingent assets are not recognised. However, when the realisation of income is virtually certain, then the related assets are no longer a contingent asset, but it is recognised as an asset.

**3.7 Revenue Recognition and Other Income**

Revenue is recognized upon transfer of control of goods (equipment) or rendering of services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those goods or services.

Generally, control is transfer upon shipment of goods to the customer or when the goods is made available to the customer, provided transfer of title to the customer occurs and the Company has not retained any significant risks and reward of ownership or future obligations with respect to the goods shipped.

Rental incomes are recognised on accrual basis on time proportion basis.

Revenue is measured at the amount of consideration which the company expects to be entitled to in exchange for transferring distinct goods or services to a customer as specified in the contract, excluding amounts collected on behalf of third parties (for example taxes and duties collected on behalf of the government). Consideration is generally due upon satisfaction of performance obligations and a receivable is recognized when it becomes unconditional.

**Contract balances****Trade receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional.

### Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made. Contract liabilities are recognised as revenue when the Company performs under the contract.

### 3.8 Foreign currency reinstatement and translation:

Transactions in foreign currencies are initially recorded by the Company at rates prevailing at the date of the transaction. Subsequently monetary items are translated at closing exchange rates as on balance sheet date and the resulting exchange difference recognised in statement of profit and loss. Differences arising on settlement of monetary items are also recognised in statement of profit and loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the transaction. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the exchange rates prevailing at the date when the fair value was determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

### 3.9 Employee Benefits

Short term employee benefits are recognized as an expense in the statement of profit and loss of the year in which the related services are rendered.

The cost of providing gratuity, a defined benefit plans, is determined using the Projected Unit Credit Method, on the basis of actuarial valuations carried out by third party actuaries at each Balance Sheet date. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income in the period in which they arise. Other costs are accounted in statement of profit and loss. Remeasurements of defined benefit plan in respect of post employment and other long term benefits are charged to the other comprehensive income in the year in which they occur. Remeasurements are not reclassified to statement of profit and loss in subsequent periods.

### 3.10 Taxes on Income

Income tax expense represents the sum of current tax (including MAT and income tax for earlier years) and deferred tax. Tax is recognised in the statement of profit and loss, except to the extent that it relates to items recognised directly in equity or other comprehensive income, in such cases the tax is also recognised directly in equity or in other comprehensive income. Any subsequent change in direct tax on items initially recognised in equity or other comprehensive income is also recognised in equity or other comprehensive income. Current tax provision is computed for income calculated after considering allowances and exemptions under the provisions of the applicable Income Tax Laws. Current tax assets and current tax liabilities are off set, and presented as net.

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the Balance sheet and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are generally recognised for all deductible temporary differences, carry forward tax losses and allowances to the extent that it is probable that future taxable profits will be available against which those deductible temporary differences, carry forward tax losses and allowances can be utilised. Deferred tax assets and liabilities are measured at the applicable tax rates. The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available against which the temporary differences can be utilised.

Minimum Alternative Tax (MAT) is applicable to the Company. Credit of MAT is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the MAT credit becomes eligible to be recognised as an asset, the said asset is created by way of a credit to the statement of profit and loss and shown as MAT credit entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income tax during the specified period.

### 3.11 Borrowing Costs

Borrowing costs specifically relating to the acquisition or construction of qualifying assets that necessarily takes a substantial period of time to get ready for its intended use are capitalized (net of income on temporarily deployment of funds) as part of the cost of such assets. Borrowing costs consist of interest and other costs that the Company incurs in connection with the borrowing of funds. For general borrowing used for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization is determined by applying a capitalization rate to the expenditures on that asset. The capitalization rate is the weighted average of the borrowing costs applicable to the borrowings of the Company that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalized during a period does not exceed the amount of borrowing cost incurred during that period. All other borrowing costs are expensed in the period in which they occur.

### 3.12 Earnings Per Share

Basic earnings per share are computed using the net profit for the year attributable to the shareholders' and weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed using the net profit for the year attributable to the shareholders' and weighted average number of equity and potential equity shares outstanding during the year including share options, convertible preference shares and debentures, except where the result would be anti-dilutive. Potential equity shares that are converted during the year are included in the calculation of diluted earnings per share, from the beginning of the year or date of issuance of such potential equity shares, to the date of conversion.

### 3.13 Current and Non-current classification

The Company presents assets and liabilities in statement of financial position based on current/non-current classification.

The Company has presented non-current assets and current assets before equity, non-current liabilities and current liabilities in accordance with Schedule III, Division II of Companies Act, 2013 notified by Ministry of Corporate Affairs.

#### **An asset is classified as current when it is:**

- a) Expected to be realised or intended to be sold or consumed in normal operating cycle,
- b) Held primarily for the purpose of trading,
- c) Expected to be realised within twelve months after the reporting period, or
- d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

#### **A liability is classified as current when it is:**

- a) Expected to be settled in normal operating cycle,
- b) Held primarily for the purpose of trading,
- c) Due to be settled within twelve months after the reporting period, or
- d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. Deferred tax assets and liabilities are classified as non-current assets and liabilities. The Company has identified twelve months as its normal operating cycle.

### 3.14 Fair Value Measurement

The Company measures financial instruments at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- a) In the principal market for the asset or liability, or
- b) In the absence of a principal market, in the most advantageous market for the asset or liability.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy.

### **3.15 Off-setting financial Instrument**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable rights to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable rights must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or counterparty.

### **3.16 Segment Reporting – Identification of Segments**

An operating segment is a component of the company that engages in business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the company's chief operating decision maker to make decisions for which discrete financial information is available. Based on the management approach as defined in Ind AS 108, the chief operating decision maker evaluates the company's performance and allocates resources based on an analysis of various performance indicators by business segments and geographic segments.

### **3.17 Cash flow statement**

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flow from operating, investing and financing activities of the company are segregated based on the available information.

### **3.18 Discontinued operation and non-current assets (or disposal groups) held for sale:**

#### **Discontinued operation:**

A discontinued operation is a component of the Company that has been disposed off or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose off such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit or loss.

#### **Non-current assets (or disposal groups) held for sale:**

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when a sale is highly probable from the date of classification, management are committed to the sale and the asset is available for immediate sale in its present condition. Non-current assets are classified as held for sale from the date these conditions are met and are measured at the lower of carrying amount and fair value less cost to sell. Any resulting impairment loss is recognised in the Statements of Profit and Loss as a separate line item. On classification as held for sale, the assets are no longer depreciated. Assets and liabilities classified as held for sale are presented separately as current items in the Balance Sheet.

### **Note 4 – SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS:**

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based on its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

#### **4.1 Property, plant and equipment:**

Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives and residual values as per schedule II of the Companies Act, 2013 or are based on the Company's historical experience with similar assets and taking into account anticipated technological changes, whichever is more appropriate.

#### **4.2 Income Tax:**

The Company reviews at each balance sheet date the carrying amount of deferred tax assets. The factors used in estimates may differ from actual outcome which could lead to an adjustment to the amounts reported.

#### **4.3 Contingencies:**

Management has estimated the possible outflow of resources at the end of each annual reporting financial year, if any, in respect of contingencies/claim/litigations against the Company as it is not possible to predict the outcome of pending matters with accuracy.

#### **4.4 Impairment of financial assets:**

The impairment provisions for financial assets are based on assumptions about risk of default and expected cash loss. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

#### **4.5 Impairment of non-financial assets:**

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount.

#### **4.6 Defined benefits plans:**

The Cost of the defined benefit plan and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and attrition rate. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

#### **4.7 Recoverability of trade receivable:**

Judgements are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

#### **4.8 Provisions:**

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgement to existing facts and circumstances, which can be subject to change. Since the cash outflows can take place many years in the future, the carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances.

**4.9 Fair value measurement of financial instruments:**

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

<b>Due to experience adjustments</b>	<b>0.09</b>	<b>0.75</b>

##### IV) Actuarial assumptions Gratuity (Unfunded)

Particulars	2024-25	2023-24
Mortality Rate	2012-14	2012-14
Discount rate (per annum)	6.55%	7.20%
Expected rate of return on plan assets (per annum)	-	-
Rate of escalation in salary (per annum)	10.00%	7.00%

The estimates of rate of escalation in salary considered in actuarial valuation, take into account inflation, seniority, promotion and other relevant factors including supply and demand in the employment market. The above information is certified by the actuary.

**V) Sensitivity Analysis**

Significant Actuarial Assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and employee turnover. The sensitivity analysis below, have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant. The result of Sensitivity analysis is given below

	As at 31st March, 2025		As at 31st March, 2024	
	Decrease	Increase	Decrease	Increase
Change in rate of discounting (Impact of increase/decrease in 50 bps on DBO)	0.00%	0.00%	0.00%	0.00%
Change in rate of salary increase (Impact of increase/decrease in 50 bps on DBO)	0.00%	0.00%	0.00%	0.00%

These plans typically expose the Group to actuarial risks such as: investment risk, interest risk, longevity risk and salary risk.

**Investment risk**

The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

**Interest risk**

A decrease in bond interest rate will increase the plan liability; however, this will be partially offset by an increase in return on the plan debt investments.

**Longevity risk**

The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

**Salary risk**

The present value of the defined plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

**31 Taxation**

**31.1** The Company has not recognised any deferred tax assets on deductible temporary differences and carried

forward business losses as it is not probable that the company will have sufficient future taxable profit which can be available against the available tax losses

#### 35.2 Fair Valuation Techniques used to determine fair value

The Company maintains procedures to value financial assets or financial liabilities using the best and most relevant data available. The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following methods and assumptions were used to estimate the fair values:

- i) Fair value of trade receivable, cash and cash equivalents, other bank balances, trade payables, loans, borrowings, deposits and other financial assets and liabilities are approximate at their carrying amounts largely due to the short-term maturities of these instruments.
- ii) The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

#### 35.3 Fair Value Hierarchy

The Company's activities are exposed to credit risk and liquidity risk which are continuously monitored.

- i) Level 1 :- Quoted Prices/published NAV (unadjusted) in active markets for identical assets or liabilities.
- ii) Level 2 :- Inputs, other than quoted prices included within level 1, that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). It includes fair value of the financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on the Company specific estimates. If all significant inputs required to fair value an instrument are observable then instrument is included in level 2.

- iii) Level 3 :- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs). If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.
